

# Public Bus Experience

Hi everyone, thank you so much for taking the time to fill in this form.

For this section, please share your experience and problems faced taking the public bus.

You can still fill in even if you only used to take bus and not anymore now.

I appreciate your effort to aid me in completing my project.

## Public Bus Improvement

I assume your experience with public bus isn't too great, it's okay I feel you

For this section, I need your opinion on the best way to improve the system and also the improvement you want to see the most.

13. How much do you wish that there is an app for you to see the live-location of the bus you want to board all the time? \*

This includes:

1. Departure time of the bus.
2. Estimated Time of Arrival to your bus stop based on bus' live-location (like how you use waze).
3. The traffic condition of the route the bus is taking.

14. How much do you wish that there is an app for you to book a pick up point for the bus you want to board? \*

(Pick up point similar to how you book Grab or Kumpool)

This includes:

1. You don't have to wave your hand to stop your bus anymore, the bus will stop at the bus stop you booked.
2. Won't have to wave just to stop the wrong bus or to be ignored by your bus.
3. Penalty will be applied to the bus drivers if they ignore the pick up point you booked and skip the bus stop.
4. Penalty fee will be charged to the users if they fail to show up when the bus arrives at the bus stop.

15. How much do you wish that there is an app for you to pay bus tickets by just scanning a QR code when you board on the bus (check-in) and get off the bus (check-out). (Similar to how train stations work) \*

This includes:

1. The system decides on the tickets fare instead of the driver.
2. Money is deducted based on the distance you traveled.
3. The app requires you to link your E-wallet (e.g TNG) or bank account for payment.
4. You don't have to keep carrying money changes around anymore to board a bus. (RM1 and 50/20/10 cents)
5. Anyone can board the bus by just registering on the app, saves the inconvenience having to apply for bus cards and top-up.

16. How much do you wish that there is an app that will notify you of changes/updates made to the bus/bus routes you have bookmarked/favorited? \*

This includes:

1. You can bookmark/favorite your bus to be always notified of information you need to know.
2. Prevent you from being confused if the bus changes appearance, number, routes etc.
3. Newest, latest and up-to-date information about all public bus 24/7.

17. In your opinion, which are the main benefits can be gained if the improvements stated above are implemented? \*

Check all that apply.

- ☐ Can save time
- ☐ Decrease pollution as more people will use public transport
- ☐ Easier for people who never take bus to understand and use public bus
- ☐ Teenagers can be more independent to travel around the city without relying on their parents
- ☐ Attracting more tourists since they can travel around without needing a car
- ☐ Accelerate economic growth since the City's good reputation will attract more investors and business
- ☐ Avoid getting scammed by bus drivers
- ☐ Avoid getting lost because you took the wrong bus
- ☐ Can save more money
- ☐ Don't have to stare at the road in front of your bus stop and rethinking your whole life decision because you wait for bus for abit too long and you're starting to think that it will never come (Avoid stress and frustration)
